Company Profile

A.S Industrial Automation

A.S Industrial Automation formerly United Engineers & Consultant, Incepted in 2006, we are a young, vibrant, control hardware & services provider company in Industrial automation.

A.S Industrial automation was established with the primary objective of machines and plant's control system designing, troubleshooting, modifications, and reverse engineering with integrated microcontroller based control systems, PLC & HMI based control systems, SCADA & DCS control systems, PC based monitoring systems and PC based control systems for big and small industries. As an automation expert company, we provide comprehensive consultancy and technical support for your valued control systems, machineries and plants inshaALLAH, we do more when other fails to do so!

We expertly automate your machine and plant by using control system of world's leading brands.

Services We Offer

- **Industrial Automation & Control**

We offer automation turnkey solutions and modifications of fully automatic, semi automatic, computer based control and microcontroller based machines & plant, in industries such as

Food Industries

Water Treatment Industries

Oil & Gas Industries

Shouger Industries

Packaging Industries

Beverages Industries

Textile

Pharmaceutical Industries

Machinery & Plant Manufacturers

we provide complete guidance to machine manufacturers for design an efficient and good productive automatic PLC controlled machine and plant, also helps for selection of control devices in low budget.

- **Automation goods supplier**

We provide PLC, HMI, instrumentation controllers, variable frequency drive (VFD), Servo motors & servo drives, stepper motors & stepper drives, control cards, analogue cards, communication cables, Sensors, encoders, etc. (new & used), as per need of clients.

we provide complete panels with complete electrical wiring with fulfill needs of client.

- **R & D Development in control**

We undertake R&D projects for plants or machineries to increase their efficiency and productivity.

- **Reverse Engineering**

We develop or duplicate any kind of existing system with same properties.

- **Automation Training**

A.S Industrial Automation provides comprehensive automation training for operators, Engineers, Executives, to improve their skill of industrial automation and control.

- **Maintenance Agreement**

A.S Industrial Automation offers yearly agreement to take care your automation and control systems through engineering experts.
